

## VERSION 11.13.11

In this version we have corrected all the problems you found in previous versions. Please continue reporting the bugs, so we can kill them...

In addition to debugging, we have implemented some new features:

**PATTERN REVIEW/SMOOTH FOR PANTO-ONLY SYSTEMS:** The panto-only systems don't have any pattern editing functions. This feature lets you review the purchased patterns, looking for breaks and unintended dwell points in them. You can also fix these glitches by using the full-featured Smooth function.

**CATALOG SCROLLBAR IN SELECTOR:** Upon popular demand we have implemented a vertical scrollbar in the catalog window. Using this feature you can scroll to the desired catalog in one swift sweep.

**SEPARATE “CLR” AND “DEL” KEYS ON KEYBOARD:** Instead of switching between the two keys, we kept the “Del” key at its original place and added a new “Clr” key. This arrangement will serve all your different preferences.

**REMOTE CONTROL:** The reported difficulties with using the large OK button in Path Pattern, block and pattern digitizing and emergency stop in Sew Quilt prompted us to find a solution that is simple and flexible enough to meet the different user preferences. It even lets you creatively mount the new control on your machine.

The remote control function uses a commercially available wireless presentation remote. We WILL NOT supply the actual device, you need to buy one of the three recommended and tested units, or go with other available hardware. However, we cannot guarantee the compatibility of untested models.

The remote control is a handheld wireless device that has at least two buttons for advancing and rewinding slides in a presentation. Some of the models also have a laser pointer. At this moment, we use only one of the buttons to act as the large OK button in Digitize Paper Pattern, Line Pattern and Mark On Quilt functions. The OK button is still active, but pressing the “PgUp” button on the remote will perform the same function.

In Sew Quilt or Preview, the remote can be used for starting stitching, pausing and restarting the IQ.

The buttons that can be activated by the remote are marked with a wireless symbol at the upper left corner. There may be multiple remote-controlled buttons on certain screens. The Help on those screens will explain the relationship between the buttons on the screens and the buttons on the remote.

The wireless remotes have a USB receiver that can be plugged in one of the USB ports of your tablet or docking station. See application notes at the different models.

The following remotes have been tested and equally recommended for the new feature. All of them can be purchased from [www.amazon.com](http://www.amazon.com).

The two remotes below have laser pointers. Please use caution, as even the low-power laser beam can be harmful if pointed directly into the eye.

The first unit has a large receiver that will not fit on the top of the i400 tablets. The docking station ports of the i400 are recommended to be used. The same ports are obstructed on the T201 docking station, so please use one of the ports on the top edge of the tablet.

#### Wireless USB Remote Presentation Clicker Pen

by [Unknown](#)

★★★★☆ (21 customer reviews) | Like (4)

List Price: ~~\$34.99~~

Price: **\$8.84** & eligible for **FREE Super Saver Shipping** on orders over \$25. [Details](#)

You Save: **\$26.15 (75%)**

**In Stock.**

Sold by [HDE](#) and [Fulfilled by Amazon](#). Gift-wrap available.

This unit has an on/off switch.

### Wireless USB Presentation Remote Clicker Pen

List Price: ~~\$34.95~~

Price: **\$11.95** & eligible for **FREE Super Saver Shipping** on orders over \$25. [Details](#)

You Save: **\$23.00** (66%)

**In Stock.**

Sold by [PlanetDQ](#) and [Fulfilled by Amazon](#). Gift-wrap available.

This remote does not have laser pointer, which eliminates the possibility of accidentally turning on the laser and pointing it to potentially harmful spots. Note that the remote can be turned on/off by moving the battery between the two battery compartments.

### Targus 2.4 GHz Wireless Presentation Remote, Range up to 50 Feet AMP18US (Black with Gray)

by [Targus](#)
